

# DUN & BRADSTREET CONNECTOR

Incorporating objective financial health assessments into your third-party risk management processes enhances due diligence by providing a multidimensional view of your third-parties' financial health. ProcessUnity offers a pre-built connector to Dun & Bradstreet's Direct Plus content feed and related data and analytics from multiple sources. The integration provides the financial status intelligence necessary to drive more-informed business decisions and reduce risk to your organization and clients.

## The Service

The Dun & Bradstreet (D&B) Direct Plus content feed delivers 10 scores or key information that serve as indicators of financial status and the risks associated with doing business with a specific organization.

**Supplier Stability Index Score (SSI):** The Supplier Stability Indicator represents the probability that a supplier will experience significant financial stress over the next 90 days.

**Supplier Evaluation Risk Score (SER):** The Supplier Evaluation Risk Rating predicts the likelihood a company will obtain legal relief from creditors OR cease operations without paying creditors in full over the next 12 months.

**Failure Score (Financial Stress Score):** The Failure Score (also known as the D&B Insolvency Score) is a predictive indicator of business insolvency.

ProcessUnity's Vendor Risk Management software protects companies and their brands by reducing risks from third-party vendors and suppliers. ProcessUnity helps customers effectively and efficiently assess and monitor both new and existing vendors – from initial due diligence and onboarding to termination. Through automation and standardization, ProcessUnity customers reduce busy work, streamline regulatory reporting, and improve overall visibility into vendor performance. To learn more about Third-Party Risk Management, go to [www.processunity.com/automate](http://www.processunity.com/automate).

Dun & Bradstreet, a leading global provider of business decisioning data and analytics, enables companies around the world to improve their business performance. Dun & Bradstreet's Data Cloud fuels solutions and delivers insights that empower customers to accelerate revenue, lower cost, mitigate risk, and transform their businesses. Since 1841, companies of every size have relied on Dun & Bradstreet to help them manage risk and reveal opportunity.

**Standard Rating (Global):** The Dun & Bradstreet Rating is a system that measures a firm’s size and composite credit appraisal, based upon information from a company’s interim or fiscal balance sheet and an overall evaluation of the firm’s creditworthiness.

**PAYDEX Score:** The PAYDEX Score represents a dollar-weighted numerical score that reflects a company’s payment performance as reported to D&B and calculates a dollar weighted average days to pay.

**Viability Rating:** The Viability Score is a multi-dimensional rating that delivers a highly insightful and reliable assessment of a company’s future viability to predict the likelihood that a company will go out of business, become inactive, or file for bankruptcy over the next 12 months.

**Delinquency Score:** The Delinquency Predictor Score predicts the likelihood that a company will pay in a severely delinquent manner (10% or more of their obligations 91+ days past term), seek legal relief from creditors, or cease operations without paying all creditors in full during the next 12 months.

**Country Name, Country ISO Alpha 2 Code and Continental Region Name:** These align the appropriate country name, country code and continental region to the vendor record for future analysis.

Integrating D&B Direct Plus scores into the ProcessUnity Third-Party Risk platform, gives you enhanced visibility into financial risks associated doing business with third-party organizations.

## The Integration

ProcessUnity offers a pre-built connector that seamlessly integrates D&B Direct Plus content into our Third-Party Risk Management platform – eliminating the need to manually enter information while also enabling you to continuously monitor each organization. The connector allows you to view current D&B scores directly within the ProcessUnity platform without having to move back and forth between a financial assessment solution and your risk management platform. Notifications can be configured to send emails when a score drops to defined thresholds to ensure organizations aren’t adversely affected by changes to their vendor’s financial standing.

The Dun & Bradstreet Connector lets you achieve integration quickly – eliminating lengthy waits for IT resource availability. You’ll partner with our Customer Success organization to define the content you want to pull into the ProcessUnity platform (based on your D&B Direct Plus subscription) and the frequency of data transfer. Our experts will build the data import templates and help you configure the required reports. Once the connector is set up and active, D&B Direct Plus scores will be automatically populated within the ProcessUnity solution on a daily, weekly, monthly or quarterly basis to enhance your Third-Party Risk Management program.

## The Requirements

ProcessUnity’s Dun & Bradstreet Connector is available for an annual subscription fee and requires a D&B Direct Plus API license from Dun & Bradstreet. Your ProcessUnity representative will provide Dun & Bradstreet contact details upon request.
