

Cybersecurity Program Management

May 18, 2021

► How confident are you in your organization's ability to respond to a cyberattack?

64% Are at best moderately confident in their ability to respond to a cyberattack.

■ Not at all confident ■ Slightly confident ■ Moderately confident ■ Very confident ■ Extremely confident

The Challenges

ACCOUNTABILITY MATTERS

Goal: Demonstrate good cybersecurity practices

Changes in the Industry

- CPRA (inf. “CCPA v2.0”) – augmented enforcement

Crackdown on Regulations – guilty offenders getting fined

- GDPR

- Google \$56.6M
- H&M \$41M
- TIM (Telecom Italia) \$31.5M
- British Airways \$26M
- Marriott \$23.8M

Fragility of Third-Party Network

- SolarWinds

CALIFORNIA
CONSUMER PRIVACY ACT

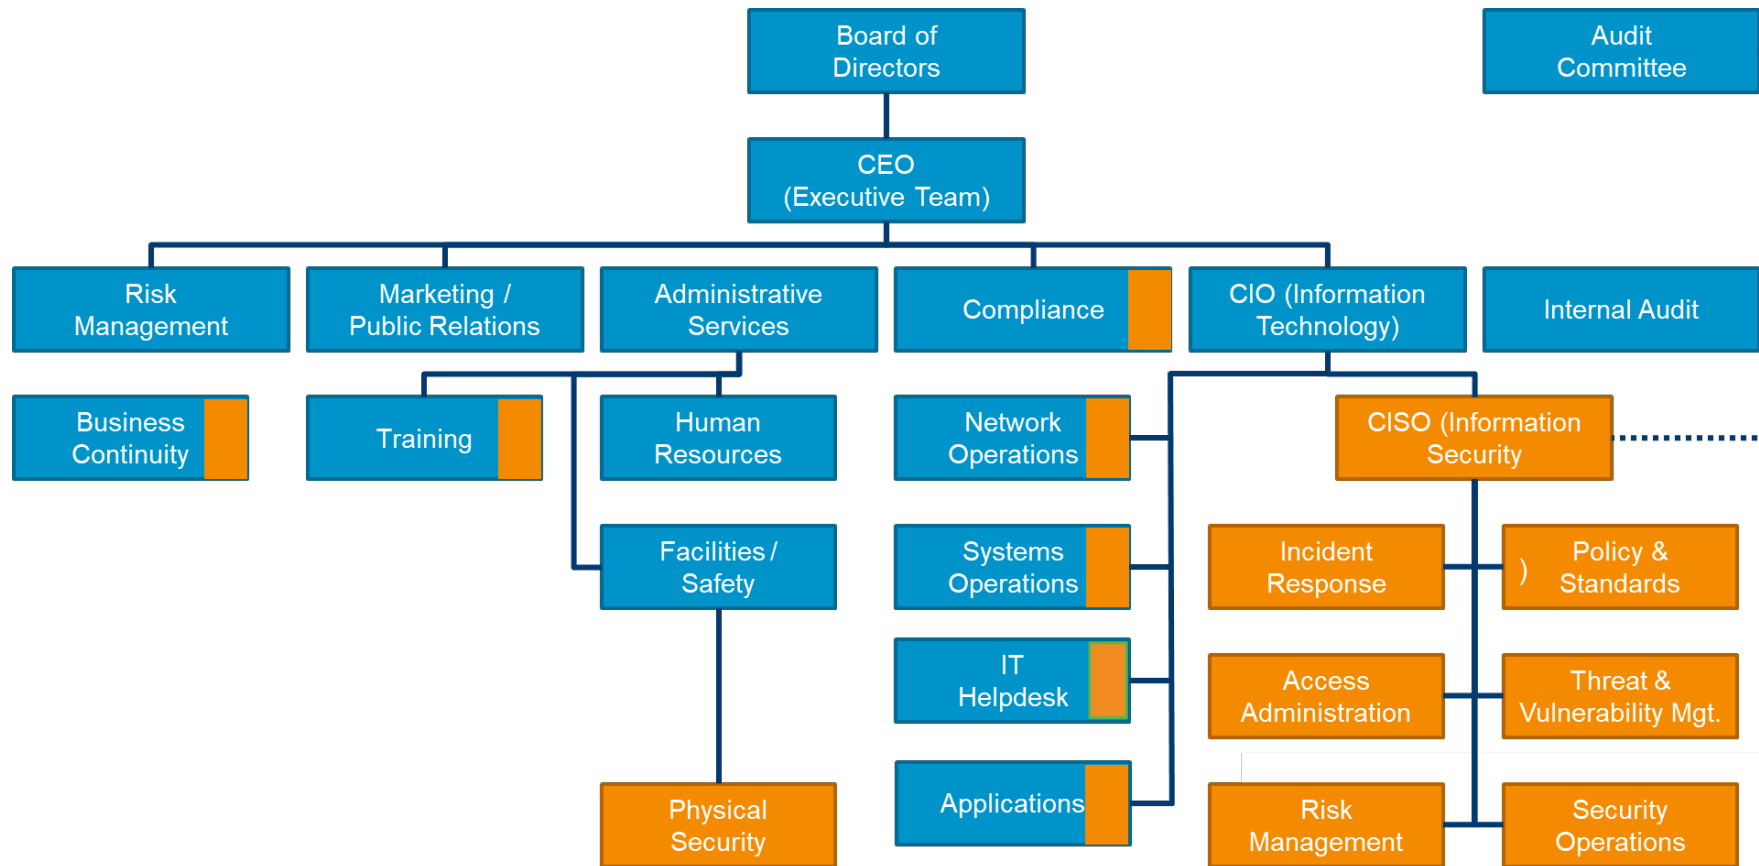

solarwinds

THE ROLE OF THE CISO

- There is a change happening.
- The CISO role will grow and gain respect.
- The CISO will become an enabler rather than a disabler.
- Enterprises will embrace the CISO's teaching function.

Cyber Risk is Pervasive

- Cross Functional
- Technical Depth & Guidance
- Business Recommendation & Policy
- Corporate-Wide Enablement & Testing
- Risk & Compliance Focal Point
- Incident Management Analytics

Cybersecurity Tools Alone Only Go So Far

Human Vulnerability

Identity & Access Management

Digital Risk Management

Messaging Security

Cyber Awareness Training

Software Level

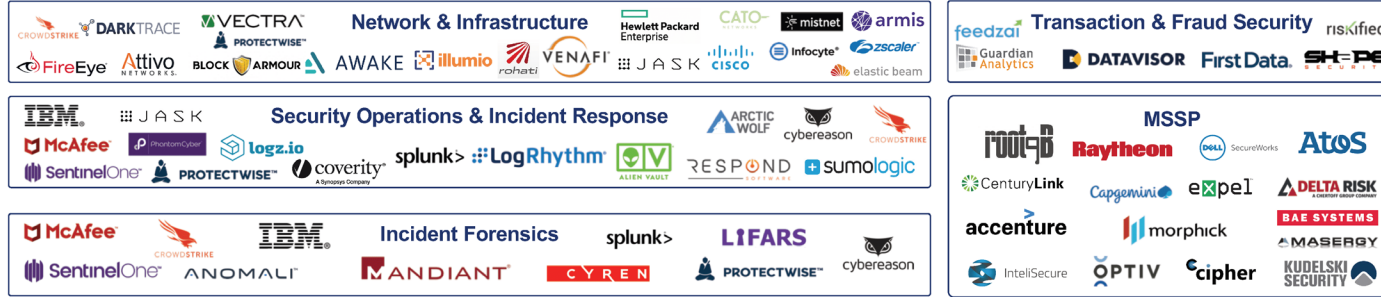

Prevention

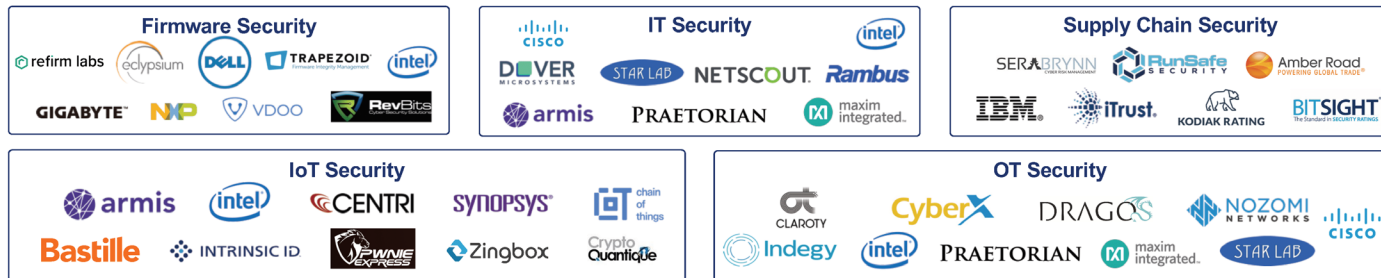

Detection & Surveillance

Response

Hardware Level

Q: How are we doing overall for cyber?

A: ?

Q: Have we improved over time?

A: ?

Q: Where do we need to focus our attention

A: ?

Q: Where are our weaknesses?

A: ?

THE STATE OF THE STATE

- Last Fall, IBM Security and the Ponemon Institute published the “*5th annual Cyber Resilient Organization Report.*” The report is based on their research from surveying more than 3,400 IT and security professionals around the world in April 2020, to determine their organizations’ ability to detect, prevent, contain and respond to cybersecurity incidents.
- Here is a sample of their findings:

Amount of organizations reporting a significant business disruption during the past two years due to a cybersecurity incident		51%
Ratio of respondents who say that Cloud services improved cyber resilience.		52%
Organizations with more than 50 tools ranked 8% lower in the ability to detect a cyberattack.		-8%
Number of organizations with no plans in place for ransomware attacks		45%
Amount of respondents who said a strong privacy posture is important to achieving cyber resilience		60%
Organizations that report cyber resilience to C-suite/board is less than		50%

ACCOUNTABILITY MATTERS

Prove to the C-suite, BoDs and regulators that the organization has:

A Plan

**Compliant Controls
and Processes**

PRESENTING TO THE BOARD

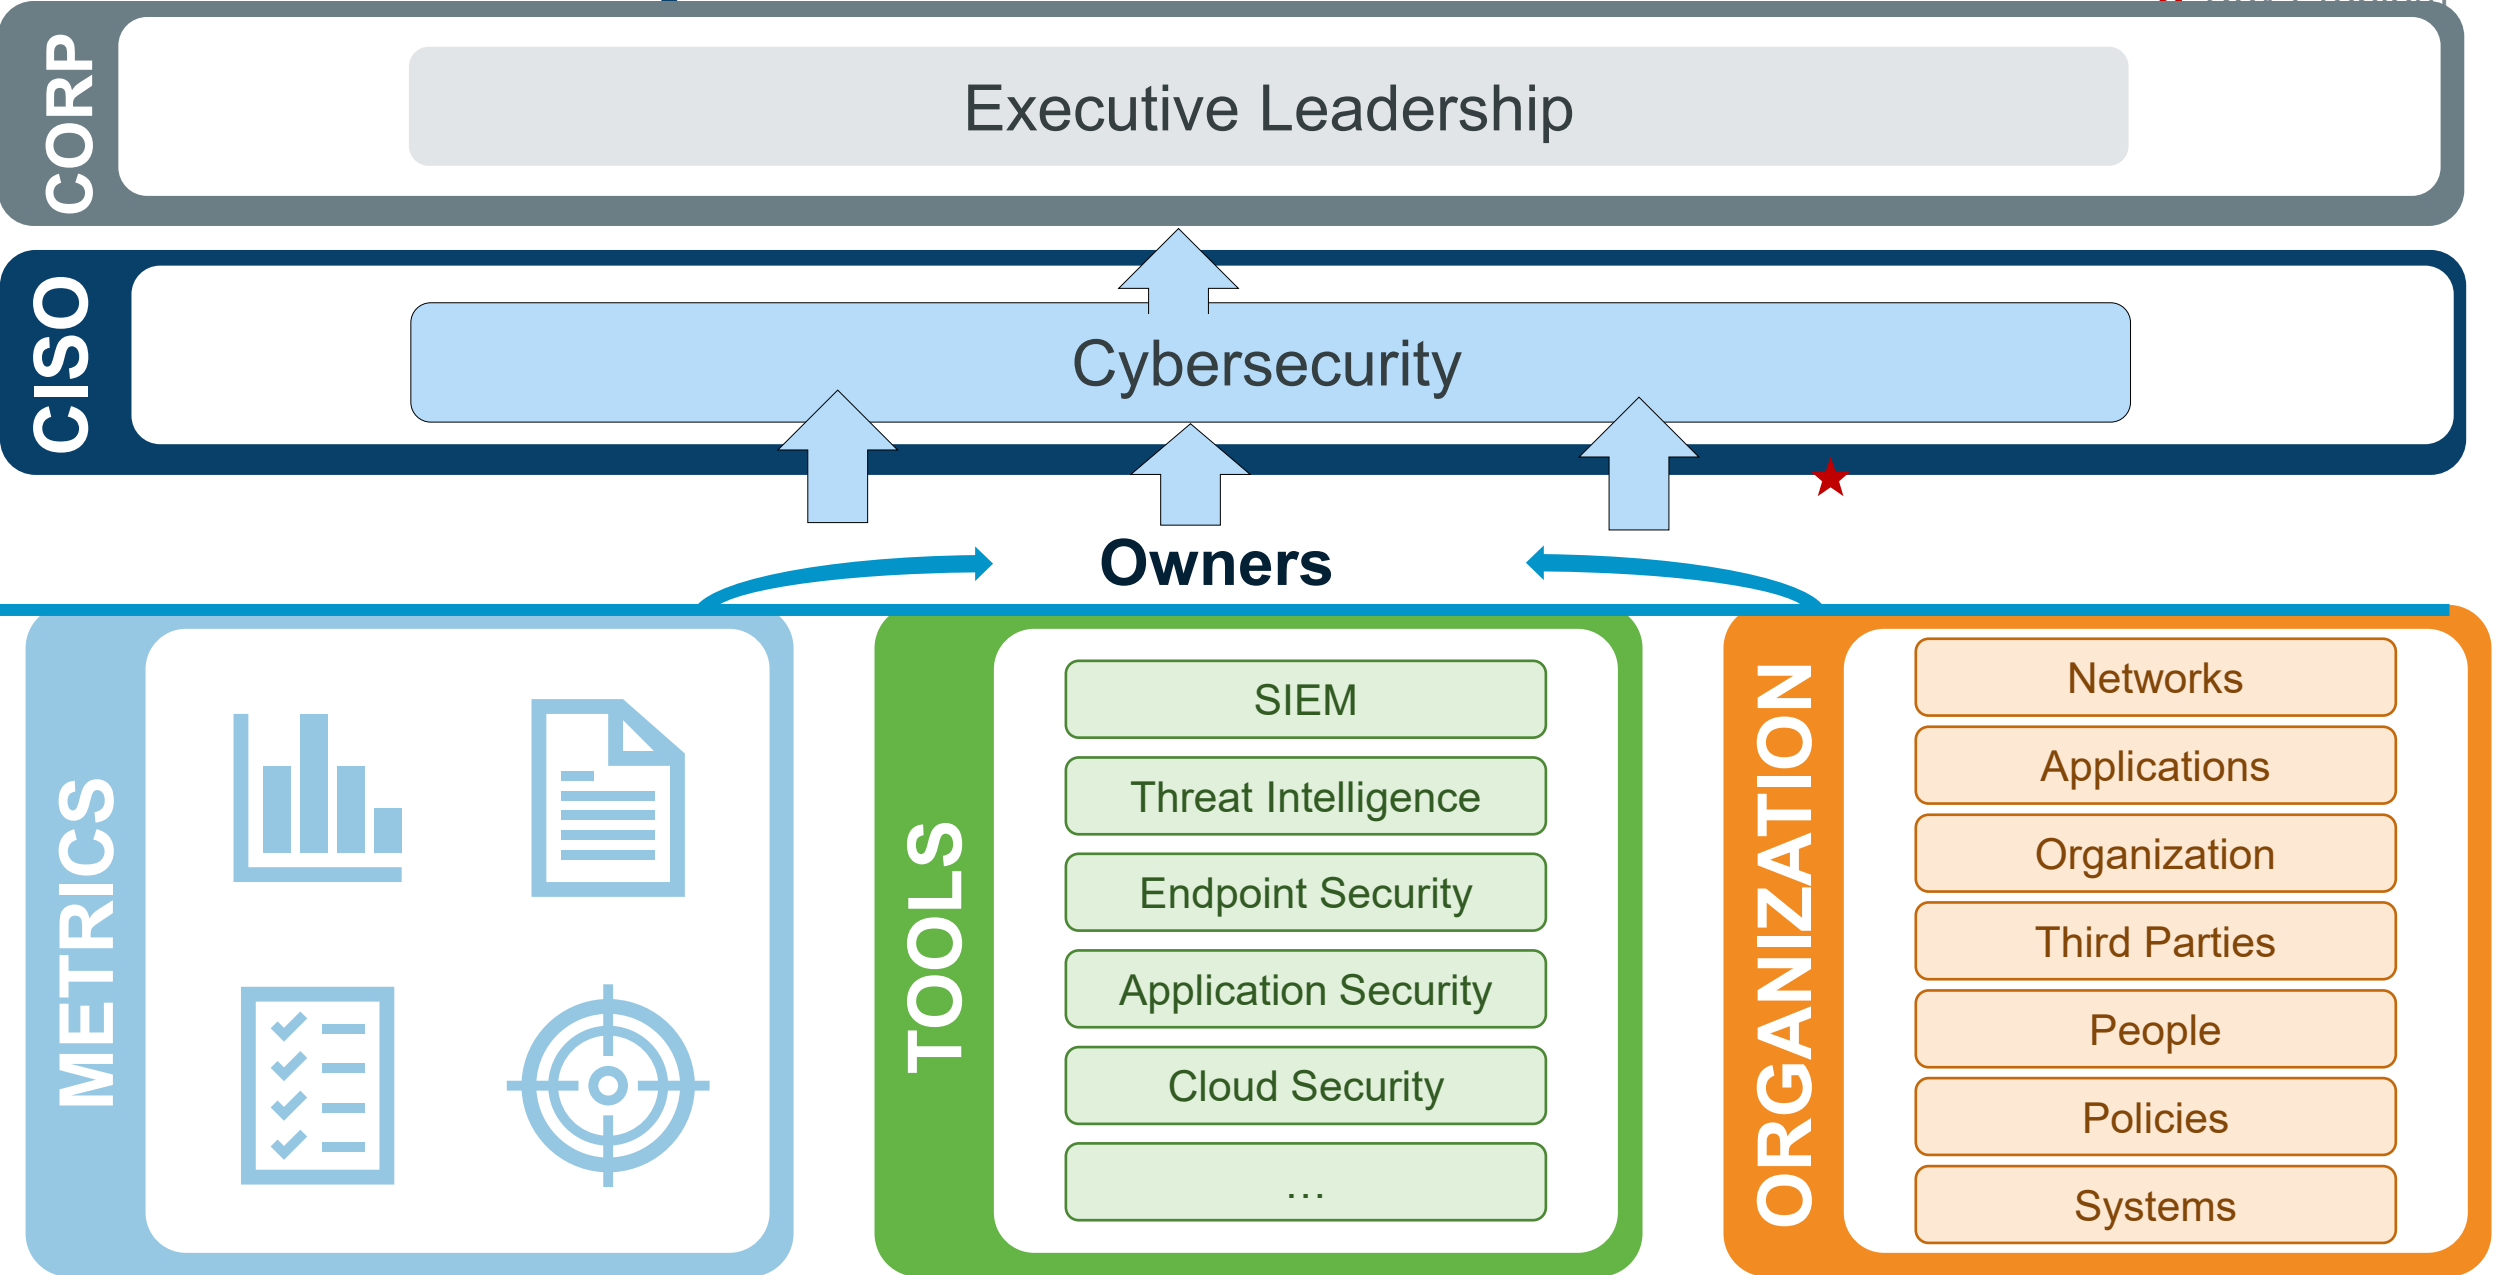

Answering the 3 key questions

- Where is the risk?
- How are you going to fix it?
- How much does it cost?

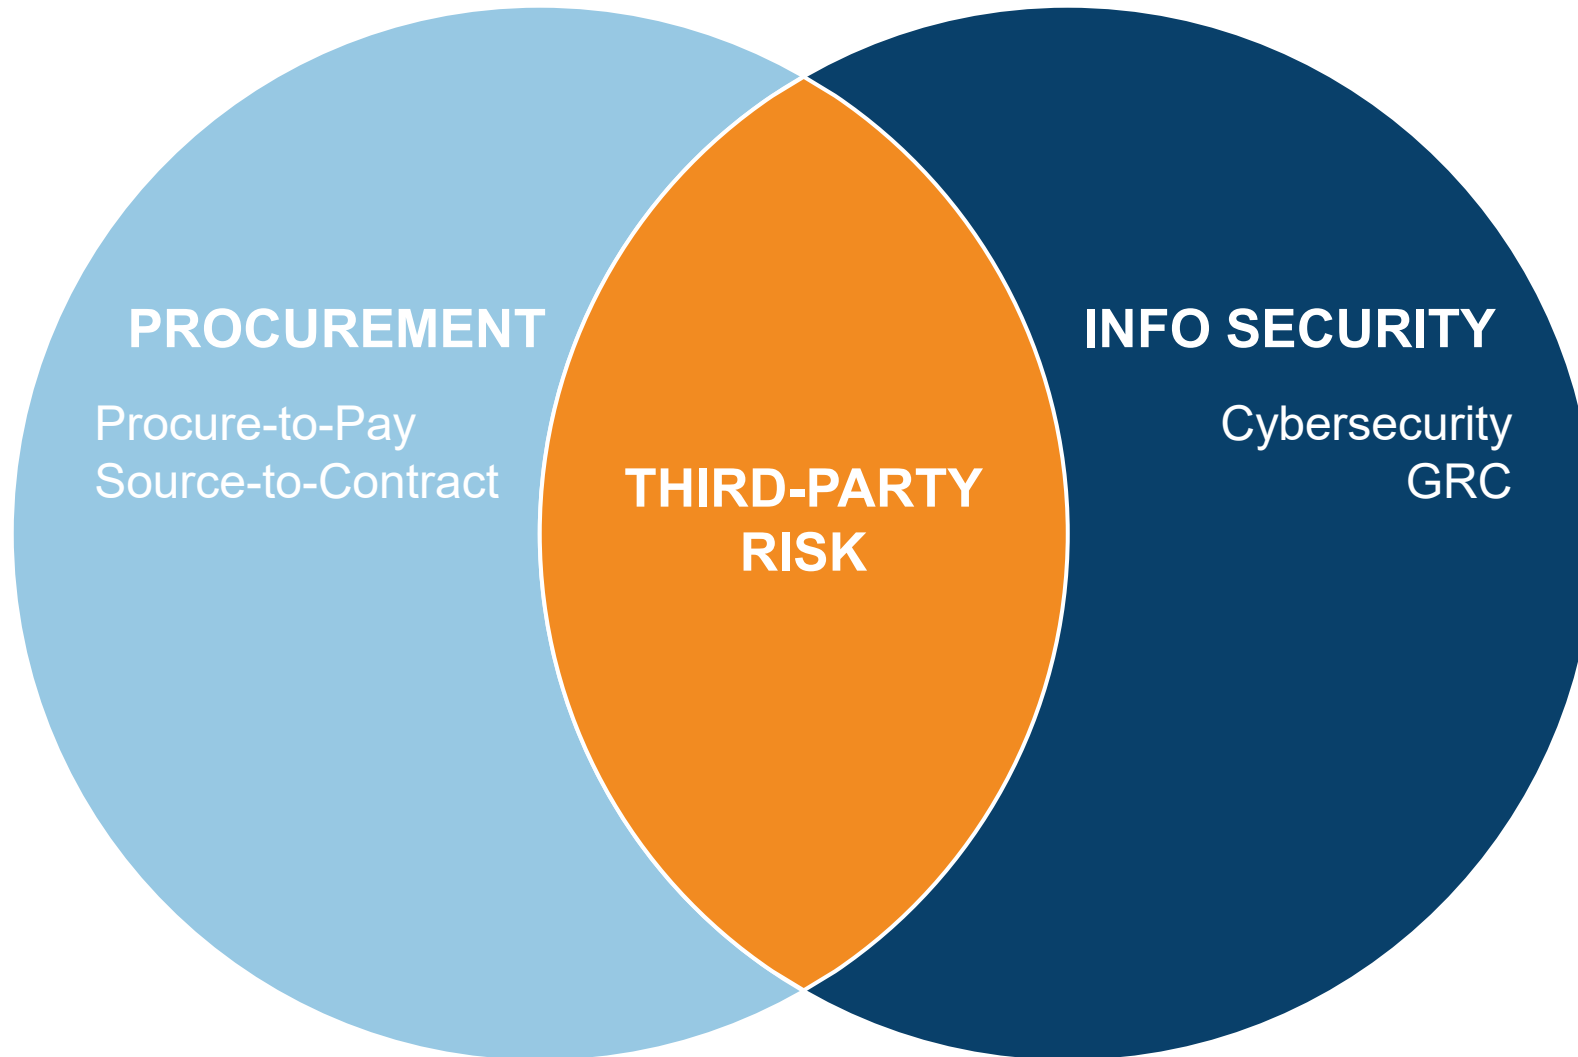

Limited Visibility & Governance
