ProcessUnity

PROCESSUNITY EVIDENCE EVALUATOR: THE BEST DATA SET FOR AI-POWERED THIRD-PARTY CONTROL REVIEWS

Data + Expertise = An Unmatched Foundation

Built on the Industry's Most Robust Cyber & TPRM Dataset that Includes:

40+ million curated question and answer pairs crafted by expert cybersecurity analysts

400+ frameworks for deep regulatory and risk alignment

Expert-Led, Human-Curated Training

Crafted by Experts, Not Crawlers

- Control-question sets are mapped and validated by TPRM professionals and cybersecurity analysts
- Results are tuned by cybersecurity data scientists using hard negatives for accuracy
- Meticulous training ensures relevance across 400+ frameworks

WHY IT MATTERS: Our AI goes beyond simple pattern recognition. It understands context, meaning, and intent for deeper document analysis and smarter outputs.

01 Document Collection

Your third parties upload policies, procedures, and evidence for analysis.

02 Parsing

Evidence Evaluator breaks down content for analysis into meaningful, usable chunks.

03 Retrieval & Ranking

Semantic search prioritizes results via fine-tuned models.

4-STEP AI REVIEW

Trained to Understand, Not Just Read

Rapid AI Analysis Optimized for Speed and Scale

04 GenAI Reasoning

The results are delivered with supporting rationale and references.

Secure & Private by Design

Privacy Built in at Every Step

- Raw documents purged after use
- Data **encryption at rest and in motion** protects you and your third parties' data
- Output references only the most relevant text blocks
- Trained exclusively on internal datasets with **no external customer or third-party data**

Don't Settle for Mediocre AI

Stay informed beyond the AI. Training data integrity matters. With Evidence Evaluator's responsible AI, you gain:

- ► Huge productivity gains
- ► Consistent, accurate control reviews
- ► Shorter due diligence cycles
- ► Accelerated insights
