

# Redefining Third-Party Risk Management with Data-Driven AI

Artificial intelligence (AI) transforms third-party risk management, enabling teams to evaluate more third parties deeply, within a fraction of the time and cost.

**ProcessUnity AI** leads the charge with intelligent, automated tools that simplify complex processes while delivering actionable insights. Purpose-built for TPRM, these tools help risk teams streamline risk assessments, minimize manual effort and human-driven errors, and optimize resource allocation.

Discover how ProcessUnity's AI capabilities help you proactively identify risk, enhance efficiency, and ensure compliance, all with results you can measure and report out.

## Purpose-Built AI Tools for TPRM

Here's how ProcessUnity AI transforms Third-Party Risk Management:

1

### Evidence Evaluator

Streamlines control, policy, and document reviews by using AI to instantly analyze and validate attestations and certifications (SOC 2, ISO, etc.), completed questionnaires, and more.

- ✔ Reduce manual review time
- ✔ Spot security gaps and unsubstantiated controls
- ✔ Validate controls quickly and confidently

2

### Assessment Autofill

Speed up third-party questionnaire response time by leveraging cybersecurity documentation to auto-populate questionnaires and streamline assessments.

- ✔ Provide a streamlined experience for third parties
- ✔ Shift focus to risk analysis and remediation
- ✔ Reduce assessment cycle times with fast, accurate, and complete responses

3

### Predictive Controls Intelligence

Continuously monitor lower-risk vendors with AI and leverage predictive capabilities to evaluate potential risks from day one.

- ✔ Score vendors based on cyber hygiene, history, and similar organizations
- ✔ Benchmark cyber risks using the Global Risk Exchange
- ✔ Cover 100% of your third-party portfolio

## ProcessUnity Risk Index

By combining externally observed signals and AI assessment analysis with a third party's internally informed control data, ProcessUnity Risk Index provides the first controls-based risk rating on the market. Based on a 100-point scale, TPRM teams can make informed, confident decisions with clarity and speed.

## The ProcessUnity AI Advantage

Powered by its data advantage and proven expertise, ProcessUnity delivers advanced AI tools that set a new standard for accuracy, efficiency, privacy, and insight. Here's what sets ProcessUnity AI apart from the crowd:

### Powered by the Global Risk Exchange

- ProcessUnity AI leverages real-time risk intelligence from the world's largest third-party risk database

### Expert Training and Tuning

- Developed and refined by TPRM and cybersecurity experts to meet the complex demands of modern risk management

### Unrivaled Control Question Expertise

- Built on 40 million+ question pairs hand-curated by top cybersecurity experts for precision and accuracy

### Fully Integrated Platform

- Embedded directly into ProcessUnity's platforms for seamless, end-to-end workflows that eliminate silos and enhance efficiency

## AI You Can Trust

ProcessUnity AI tools enhance but don't replace your risk team by combining real-time data, intelligent automation, and a privacy-first design. Work faster, safer, and more confidently with AI that:

### Delivers reliable, context-aware results

- Developed on a proprietary LLM built for TPRM
- Leverages real-time intelligence from the Global Risk Exchange
- Provides context-aware, reliable data

### Protects sensitive data at every step

- All data is encrypted in transit and at rest
- Vendor evidence is destroyed post-processing
- No real third-party evidence used in training

### Stays aligned with changing regulations

- Continually retrains on evolving standards
- Always aligned with latest frameworks

### Supports and scales with your team

- Automates repetitive processes
- Frees analysts to focus on high-priority tasks

## See AI-driven results in weeks, not months.

AI is not the future of third-party risk management — it's the present. Ready to detect risks faster, close compliance gaps, and save time, money, and resources?

## Begin your AI-powered TPRM journey today.

## About ProcessUnity

ProcessUnity is the Third-Party Risk Management (TPRM) Company. Our software platforms and data services protect customers from cybersecurity threats, breaches, and outages that originate from their ever-growing ecosystem of business partners. By combining the world's largest third-party risk data exchange, the leading TPRM workflow platform, and powerful artificial intelligence, ProcessUnity extends third-party risk, procurement, and cybersecurity teams so they can cover their entire vendor portfolio. With ProcessUnity, organizations of all sizes reduce assessment work while improving quality, securing intellectual property and customer data so business operations continue to operate uninterrupted.
