

THIRD-PARTY RISK MANAGEMENT

ProcessUnity Global Risk Exchange

The World's Largest Library
of Third-Party Risk Data

ProcessUnity 

THE WORLD'S LARGEST LIBRARY OF THIRD-PARTY RISK DATA

What would it be like to have vendor risk data that you can really trust – data that's reliable, consistent, and up to date? With the Global Risk Exchange from ProcessUnity, you get access to over **18,000** attested vendor assessments, more than **360,000** vendor risk profiles, and the industry's most comprehensive external threat intelligence. Using an assess-once, share-many model, the Exchange eases the burden of due diligence for organizations and their third parties, resulting in an all-around faster assessment process, better risk data, and well-informed mitigation plans.

Designed to address the increasing gap between Third-Party Risk Management (TPRM) resources and program demands, the Exchange helps organizations extend their existing resources and achieve greater coverage of their vendor portfolios. Whether you're tackling an assessment backlog, conducting due diligence in the wake of a cyber event, or looking to optimize contract cycles with new vendors, the Exchange delivers the data you need to safeguard your organization and foster resilient business relationships.

HOW WE HELP

Risk Rank Your Portfolio

Don't waste time guessing which of your vendors need deeper due diligence. With the Exchange, you get immediate automated inherent risk scores for your entire portfolio. Inherent Risk Scores rank your vendors based on factors unique to your relationship with them, such as access to sensitive data, critical systems, and operational importance. Leverage the scores to focus your team's resources on the highest-risk vendors, so you can weed out unnecessary assessment efforts.

Accelerate Vendor Onboarding

Make your onboarding process a business-enabling function, not a roadblock. Once your vendors are prioritized with automated Inherent Risk Scores, tap into a library of over 18,000 attested, validated assessments via the Exchange, empowering you to thoroughly vet vendors without creating long onboarding delays.

Eliminate Your Assessment Backlog

You have more vendors and more requirements to assess than ever before. With the Global Risk Exchange, you gain access to completed third-party assessments pre-mapped to the most common industry frameworks, such as NIST and ISO. Need only a specific set of information from your vendor? Tailor your request to a portion of the questionnaire to encourage a faster response and quicker analysis, driving down the size of your backlog.

HOW WE HELP

Keep Tabs on Changing Risk Levels

Let's face it a vendor's risk posture is bound to change. And when it does, you need to know about it. Between assessments, the Exchange delivers a holistic view of vendor risk through a combination of self-attested assessments, external threat intelligence, and outside-in scanning. Throughout the year, features such as Threat Profiles and on-demand data refreshes ensure that you're well-positioned to respond to emerging vulnerabilities.

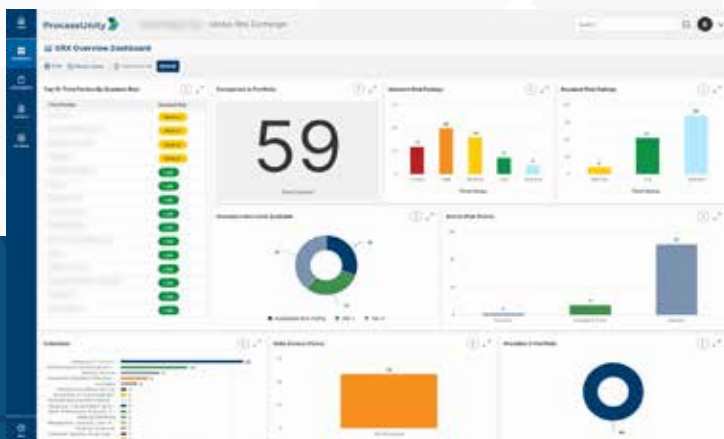

Extend Resources Across Your Portfolio

Even the most well-staffed TPRM teams can face trouble getting the data they need due to resource constraints or unresponsive vendors. In lieu of a complete assessment, you can access over 360,000 Vendor Risk Profiles in the Exchange, enabling your team to gain full portfolio coverage without needing to send or receive an assessment to or from every vendor. Leverage Vendor Risk Profiles to prioritize critical third parties for a deeper assessment while covering your bases on medium to lower-risk third parties.

Seamlessly Integrate Exchange Data

Efficient TPRM teams combine data and workflow automation for a well-rounded program. Leverage Exchange data within the ProcessUnity TPRM or Threat and Vulnerability Response platforms. Have your own platform? Easily connect to any other enterprise tools via a flexible API integration.

View a summary of your Exchange data in a dynamic, drilldown dashboard.

BENEFITS

Independent customer research conducted by GRC 20/20 found that the ProcessUnity Global Risk Exchange delivers customers a:

75%

reduction in
inherent risk
assessments

80%

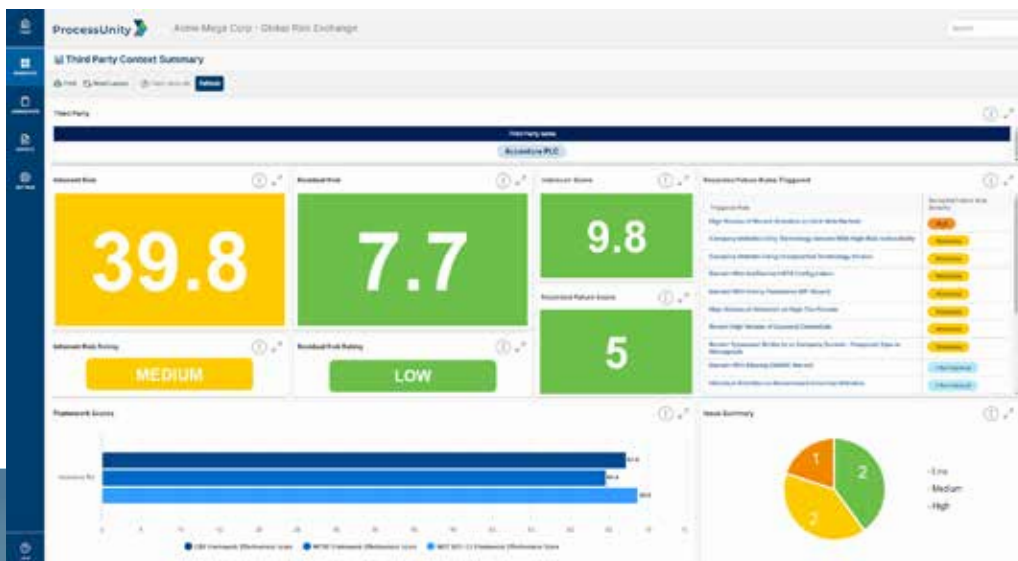

reduction in
assessments

80%

reduction in
active threat
response

90%

reduction in
reporting

Vendor Risk Profiles provide a snapshot of a vendor's Inherent and Residual risk, combined with external threat intelligence and risk scores, for a holistic, at-a-glance risk evaluation.

WHAT'S IN THE GLOBAL RISK EXCHANGE

18,000+ completed and attested assessments including:

- 80% of Fortune 500 Companies
- 4 of the top 5 cloud providers
- 12 of the top 20 law firms
- 4 of the top 5 private equity firms
- The big 4 accounting firms

360,000+ Vendor Risk Profiles with data on third parties':

- Firmographic Information
- Inherent Risk Score and Rating
- Residual Risk Score and Rating
- Framework Score
- Number of Highly Critical Findings (based on your unique relationship to the third party)
- RiskRecon Rating
- Rules Triggered by Recorded Future

Data Partnerships

- Threat Profiles mapped to your third party's control gaps
- Outside-in scanning data
- Security Ratings
- Real-time CVE and CWE alerts from the NIST National Vulnerability Database on emerging threats and vulnerabilities (available via ProcessUnity Threat and Vulnerability Response)
- Fourth-party mapping (available via ProcessUnity Threat and Vulnerability Response)

Automated Workflow

- Assessment Findings Review
- Issue Management
- Pre-Built Reports and Dashboards
- Notifications and Alerts
- Pre-Built Integration to the ProcessUnity TPRM Platform and Threat & Vulnerability Response Platform

CREATE A DATA-FIRST APPROACH TO THIRD-PARTY RISK MANAGEMENT

Ready to eliminate redundancy in your TPRM assessment methods and join a community of risk practitioners transforming their program with data?

Visit www.processunity.com to learn more, or schedule a call to discuss how ProcessUnity's Global Risk Exchange can help.

ProcessUnity is the Third-Party Risk Management (TPRM) company. Our software platforms and data services protect customers from cybersecurity threats, breaches, and outages that originate from their ever-growing ecosystem of business partners. By combining the world's largest third-party risk data exchange, the leading TPRM workflow platform, and powerful artificial intelligence, ProcessUnity extends third-party risk, procurement, and cybersecurity teams so they can cover their entire vendor portfolio. With ProcessUnity, organizations of all sizes reduce assessment work while improving quality, securing intellectual property and customer data so business operations continue to operate uninterrupted.
